DATE MAILED: 08/25/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

TAK

<b>Office Action Summary</b>	<b>Application No.</b> 10/624,016	<b>Applicant(s)</b> TAKAGI ET AL.	
	<b>Examiner</b> Michael G. Bogart	<b>Art Unit</b> 3761	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 09 August 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-10 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 21 July 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### *Claim Rejections – 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(f) he did not himself invent the subject matter sought to be patented.

Claims 1, 2, 4, 5, 7, 8 and 10 are rejected under 35 U.S.C. § 102(b) as being anticipated by Penska (US 3,101,714).

Regarding claim 1, Penska teaches a catamenial tampon comprising:

a primary absorbent member (10); and

a withdrawal cord (12) having a withdrawal portion and an attachment portion, the attachment portion being joined to the primary absorbent member (10);

the withdrawal cord (12) including a composite yarn which includes a continuous string (14, 16), and a secondary absorbent member (13) joined to a part of the continuous string (14, 16);

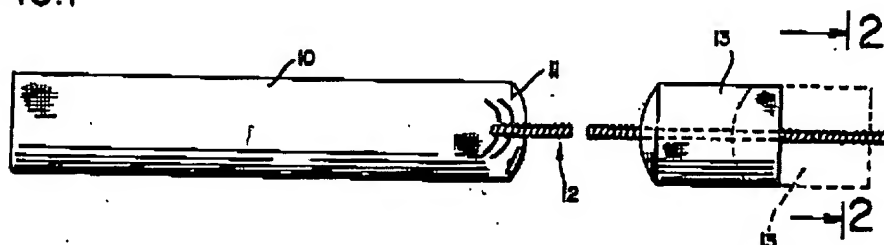

Art Unit: 3761

wherein the continuous string (14, 16) which has the secondary absorbent member (13) joined thereto is woven according to a predetermined weaving manner after being provisionally twisted, thereby forming the attachment portion and the withdrawal portion (see figure 1, below).

Regarding claim 2, Penska teaches a continuous string (14) woven in a twisting-tubular manner.

Regarding claims 4 and 5, Penska teaches that the attachment portion of the withdrawal cord (12) is stitched (11, 16) to the primary absorbent member (10) according to a predetermined stitching ;

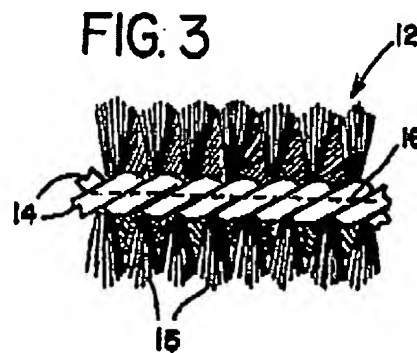

and further wherein at least a part of the withdrawal portion of the withdrawal cord (12) is additionally stitched (11, 16) according to the predetermined stitching manner.

**FIG. 1**

Regarding claims 7 and 8, Penska teaches that the withdrawal cord (12) has a wicking mechanism (15) which wicks a fluid upwardly toward the primary absorbent member (10); and

wherein the wicking mechanism is a hydrophilicity gradient, a density gradient or a capillary gradient formed in the withdrawal cord (12) due to the absorbent tufts (15)(col. 1, lines 63-70; col. 2, lines 26-37).

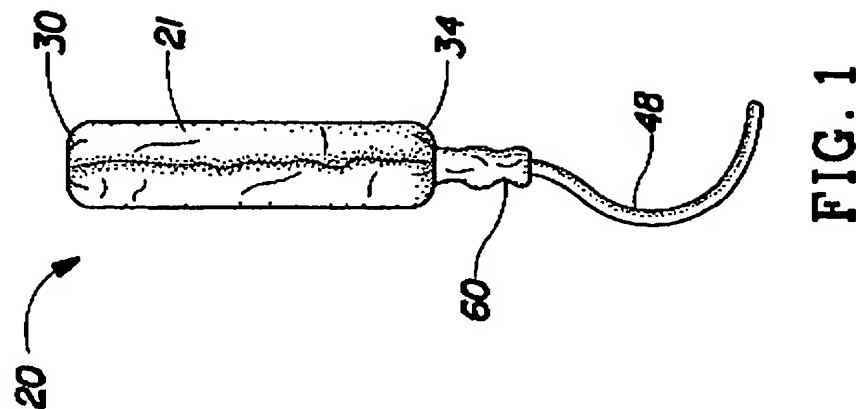

Regarding claim 10, Penska teaches a plurality of strings (14)(see figure 3, below).

Claims 1 and 3 are rejected under 35 U.S.C. § 102(e) as being anticipated by Taylor *et al.* (US 6,258,075 B1).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. § 102(e). This rejection under 35 U.S.C. § 102(e) might be overcome either by a showing under 37 CFR § 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR § 1.131.

Regarding claim 1, Taylor *et al.* teaches a catamenial tampon (20) comprising:  
a primary absorbent member (21); and  
a withdrawal cord (48, 60) having a withdrawal portion (48) and an attachment portion (60), the attachment portion (60) being joined to the primary absorbent member (21);  
the withdrawal cord (48, 60) including a composite yarn which includes a continuous string (48), and a secondary absorbent member (60) joined to a part of the continuous string (48);  
wherein the continuous string (48) which has the secondary absorbent member (60) joined thereto is woven according to a predetermined weaving manner after being provisionally twisted, thereby forming the attachment portion and the withdrawal portion (see figure 1, below).

Regarding claim 3, Taylor *et al.* teach a diameter ration of the attachment portion (60) to the withdrawal portion (48) of the withdrawal cord (48, 60) is at least about 1.5 (figure 1).

Claims 1 and 3 are rejected under 35 U.S.C. § 102(a) as being anticipated by Taylor *et al.* (WO 00/61052 A1).

In the international patent issued prior to the filing date of the claimed invention, Taylor *et al.* expressly disclose every limitation of claims 1 and 3. There is no common inventor in Taylor *et al.* and the instant invention. This demonstrates that the claimed subject matter was known and used by other prior to the filing date of the instant application.

Claims 1 and 3 are rejected under 35 U.S.C. § 102(f) because the applicant did not invent the claimed subject matter.

As described supra in the rejection under 35 USC § 102(e), Taylor *et al.* (WO 00/61052 A1) expressly disclose every limitation of claims 1 and 3 in a patent published prior to the filing date of the instant invention. Taylor *et al.* do not share any common inventors with that of the present invention, and thus preclude finding that applicants are the actual inventors of the claimed invention.

***Claim Rejections – 35 USC § 103***

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. § 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. § 103(c) and potential 35 U.S.C. § 102(e), (f) or (g) prior art under 35 U.S.C. § 103(a).

Claim 6 is rejected under 35 U.S.C. § 103(a) as being unpatentable over Penska as applied to claims 1, 2, 4, 5, 7, 8 and 10 above, and further in view of Hirayama (US 4,237,804).

Penska does not show double ring stitching according to (JIS) No. B 9070.

Hirayama teaches the use of this standard in industrial sewing (column 3, lines 25-33).

At the time of the invention, it would have been obvious to one of ordinary skill in the art to apply the double stitching technique of Hirayama to construct the tampon of Penska as this type of stitch provides a very secure attachment.

Claim 9 is rejected under 35 U.S.C. § 103(a) as being unpatentable over Penska as applied to claims 1, 2, 4, 5, 7, 8 and 10 above, in view of Brinker (US 5,592,725 A).

Penska does not teach an absorbent member comprising fleece.

Brinker teaches a tampon having an absorbent member comprising fleece (abstract).

At the time of the invention, it would have been obvious to one of ordinary skill in the art to select fleece to construct the second absorbent member of Penska with fleece as taught by Brinker as the material is widely available, is an effective absorbent and is inexpensive.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Bogart whose telephone number is (571) 272-4933.

In the event the examiner is not available, the Examiner's supervisor, Tatyana Zalukaeva may be reached at phone number (571) 272-1115. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300 for formal communications. For informal communications, the direct fax to the Examiner is (571) 273-4933.

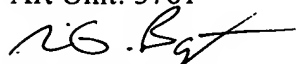

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-3700.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
